

ABOUT THE TOWN & COUNTRY FAMILY

For 57 years, Town & Country has designed and built some of the most luxurious, sought-after homes in the nation. Our reputation for the highest quality extends around the world. Town & Country Log and Timber homes can be found throughout North America as well as in Great Britain, Switzerland, Belgium, Denmark, Thailand, Ireland, the Cayman Islands and Japan. Town & Country consists of these four divisions:

Town & Country Luxury Built Cedar Homes

Turnkey, custom-designed log and timber crafted homes priced from \$450,000 to \$10 million. In addition, this division offers Mountain Cabins, snug chalets with innovative architecture, priced from \$325,000 to \$380,000.

The Cedars of Town & Country

A new line of system-built homes priced between \$175,000 and \$350,000. These homes have many of the features of a custom-built home, yet they can be completed — from start to finish — in just 16 weeks.

Heartwood Cedar & Pine Products

Customers come from far and wide to Heartwood's mill for everything from a single railing spindle to an entire building. Products include half-log siding, hand-hewn trim, smooth and double-bead paneling, shakes and timbers.

WoodCraft

The craftsmen of WoodCraft are artists who create one-of-a-kind custom accessories, including wall sconces, beds, armoires, gazebos, stairways, chairs, arches and mantles.

Let Town & Country help you on your quest for comfort, security, and peace of mind.
